Gh) IMPORTANT LETTER IN A SCIENCE MAGAZINE

Gh.1) [Claiming precedence]

"Virtually first" (letter)

New Scientist magazine, 214(2861), 21 April 2012, p. 37

 From Ephraim Nissan, Goldsmiths, University of London
 You reported on animals made to think inside a virtual world
 (17 March, p 6). Virtual reality for animals is a concept
 I proposed nearly 20 years ago in a paper entitled "Cyberspace
 for animal husbandry" (*Computers and Electronics in Agriculture*,
 vol 8, p 251). I suspect this is widespread in scholarship.
 Your idea is only recognised and taken up when the time is ripe.
 London, UK

 The editor writes:

Indeed, it seems that "major innovations occur not when
 an inventor is struck by a bolt from the blue, but when
 the scientific and social conditions are ripe" (18 February, p 3).
